Farmer Automatic

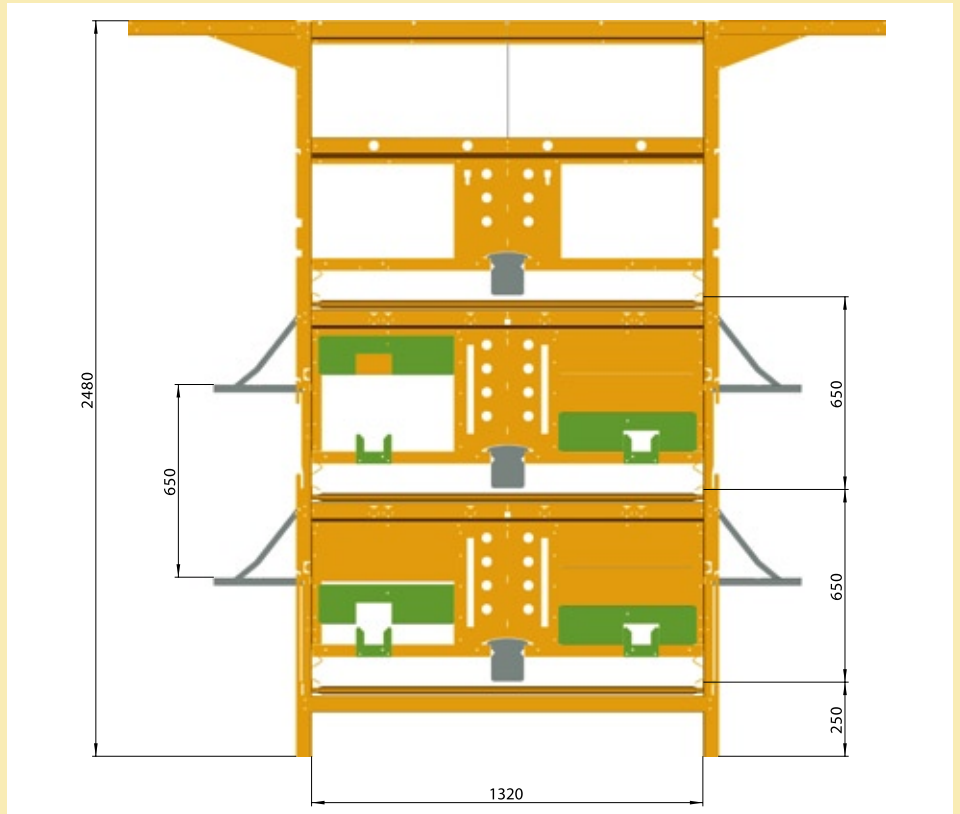

# Aviary System

Pullet-Rearing Aviary

# The intelligent pullet rearing aviary

## Well-planned design

The Farmer Automatic Aviary System offers a well-planned, proven total solution for rearing chicks that are to be kept as pullets and layers in aviaries:

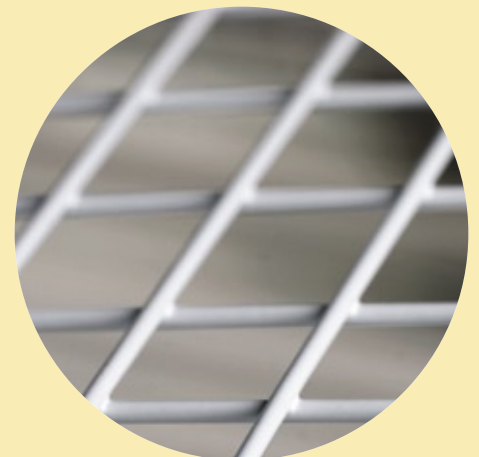

- Pullet baby chicks spend their first days in small compartments within the system.
- Vaccinations and other treatments are easily administered.
- The compartments can later be transformed into an open aviary in just a few moves.
- The degree of automation can be adjusted individually, for example, with optional automatically closing doors.

24V LED light tube:  
simulates daylight for better acceptance of the system

Easy handling:  
system comprises flip doors and roost mesh

Choice of fittings:  
cage floors in three mesh sizes

# ary

## Automatic feeding system

The proven Farmer Automatic chain feeding system is extremely effective, easy to handle and reliable in use. Long-lasting and wear-resistant, it has speed control and optional height adjustment to ensure feed is distributed evenly.

## Simple drinking system

The nipple drinkers are continuously adjustable to perfectly match the growth of the birds. A choice of different types of nipple is available.

## Tried-and-tested technology

The adjustable perches protect the feed from contamination and also assist the birds in becoming settled in the layer aviary. From the second week of life the perches are set so that the birds can no longer get into the feed trough.

## Advantages at a glance

- Flip doors and roost mesh for easy closing of the system
- Optional centrally controlled locking mesh doors
- Plastic coated mesh floor with three different mesh sizes
- Doors in partition walls allow birds to be locked in for easy treatment
- 24V LED light tube helps day old pullet baby chicks to find feed and water more easily
- Optional height-adjustable chain feeding system
- Centrally adjustable nipple drinkers with drip cups and perches
- Manure belts switch off individually
- Automatic manure removal for a clean environment
- Two and three tier version
